proposing is, looking at Fall 2014 learning support students, what are 2/3 boundaries to get people into the coreq course. Math is opposite – 2/3 into foundations and only 1/3 in coreq, because our students are so shaky in math. This is all applied to Spring 2016.

1. Philosophical discussion of what STEM is
2. Mr. Weathersby: Does this affect Aviation's certificate students? Certificate students only use the COMPASS, and the COMPASS is being phased out. Might not matter because it's focused on learning support students, or traditional students. maybe an edit for aviation certificate
Edit: After COMPASS in second bullet point add " (if freshman has been out of high school five years or more, or aviation certificate-seeking student)."
