Section	Section Number	Section Name	Section Description	Section Type	Section Status
1	101	Introduction to Psychology	Introduction to the field of psychology, covering topics such as behavior, cognition, and development.	Lecture	Open
2	102	Biological Psychology	Exploration of the biological bases of behavior, including the nervous system, hormones, and genetics.	Lecture	Open
3	103	Developmental Psychology	Study of human development from infancy to old age, focusing on physical, cognitive, and social changes.	Lecture	Open
4	104	Abnormal Psychology	Introduction to the study of mental disorders, including their symptoms, causes, and treatments.	Lecture	Open
5	105	Research Methods in Psychology	Overview of the scientific process in psychology, including research design, data collection, and analysis.	Lecture	Open
6	106	Psychology of Women	Examination of the psychological experiences and behaviors of women across different cultures and stages of life.	Lecture	Open
7	107	Psychology of Aging	Study of the psychological changes and challenges associated with the aging process.	Lecture	Open
8	108	Psychology of Health	Exploration of the psychological factors that influence health and illness, including stress and coping mechanisms.	Lecture	Open
9	109	Psychology of Learning	Study of the processes of learning, including classical and operant conditioning, and cognitive learning theories.	Lecture	Open
10	110	Psychology of Memory	Investigation of the processes of memory, from encoding and storage to retrieval and forgetting.	Lecture	Open
11	111	Psychology of Intelligence	Study of the nature and measurement of intelligence, and the factors that influence cognitive abilities.	Lecture	Open
12	112	Psychology of Personality	Exploration of the various theories and models of personality, and the factors that shape individual differences.	Lecture	Open
13	113	Psychology of Emotion	Study of the physiological and psychological components of emotion, and the role of emotion in behavior.	Lecture	Open
14	114	Psychology of Motivation	Investigation of the factors that drive human behavior, including biological, psychological, and social influences.	Lecture	Open
15	115	Psychology of Social Interaction	Study of the psychological processes that govern social behavior, including social perception and social norms.	Lecture	Open
16	116	Psychology of Language	Exploration of the psychological processes involved in language acquisition, production, and comprehension.	Lecture	Open
17	117	Psychology of Attention	Study of the processes of attention, including the selection and focus of information in the environment.	Lecture	Open
18	118	Psychology of Perception	Investigation of the processes of perception, including the encoding and interpretation of sensory information.	Lecture	Open
19	119	Psychology of Decision Making	Study of the psychological processes that influence decision making, including cognitive biases and heuristics.	Lecture	Open
20	120	Psychology of Problem Solving	Exploration of the psychological processes involved in problem solving, including the use of cognitive strategies and heuristics.	Lecture	Open

Section	Section Number	Section Name	Section Description	Section Type	Section Status
21	121	Psychology of Creativity	Study of the psychological processes that underlie creative thinking and problem solving.	Lecture	Open
22	122	Psychology of Stress	Investigation of the psychological and physiological responses to stress, and the role of stress in health and behavior.	Lecture	Open
23	123	Psychology of Sleep	Study of the biological and psychological processes that regulate sleep and wakefulness.	Lecture	Open
24	124	Psychology of Consciousness	Exploration of the nature and measurement of consciousness, and the factors that influence awareness and perception.	Lecture	Open
25	125	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
26	126	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open
27	127	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
28	128	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open
29	129	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
30	130	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open

Section	Section Number	Section Name	Section Description	Section Type	Section Status
31	131	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
32	132	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open
33	133	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
34	134	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open
35	135	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
36	136	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open
37	137	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
38	138	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open
39	139	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
40	140	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open

Section	Section Number	Section Name	Section Description	Section Type	Section Status
41	141	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
42	142	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open
43	143	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
44	144	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open
45	145	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
46	146	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open
47	147	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
48	148	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open
49	149	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
50	150	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open

Section	Section Number	Section Name	Section Description	Section Type	Section Status
51	151	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
52	152	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open
53	153	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
54	154	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open
55	155	Psychology of Memory and Learning	Study of the psychological processes that govern memory and learning, including the role of practice and repetition.	Lecture	Open
56	156	Psychology of Emotion and Motivation	Investigation of the psychological processes that govern emotion and motivation, and the role of these processes in behavior.	Lecture	Open
57	157	Psychology of Social Interaction and Personality	Study of the psychological processes that govern social interaction and personality, and the role of these processes in behavior.	Lecture	Open
58	158	Psychology of Language and Attention	Exploration of the psychological processes that govern language and attention, and the role of these processes in behavior.	Lecture	Open
59	159	Psychology of Perception and Decision Making	Study of the psychological processes that govern perception and decision making, and the role of these processes in behavior.	Lecture	Open
60	160	Psychology of Problem Solving and Creativity	Investigation of the psychological processes that govern problem solving and creativity, and the role of these processes in behavior.	Lecture	Open

Does it reflect disciplinary content that has recently emerged? Does it pertain to program or through program? All new or revised outcomes must be justified in terms of student needs.

TENTATIVE COURSE SCHEDULE.

Date:	Learning Focus:
Week 1	What is literacy, and why does it matter? What is the role of literacy in the content classroom? What is the relationship between disciplinary inquiry and

Book report and presentation: Students will choose and read a book (that has not been read before) from the list below and develop a report and poster presentation in response to the text. Written reports should be typed and consist of a 5- to 6-page reflection that answers the following questions: – What is the author’s purpose in writing the book? – What major points does the author make? – What can we learn from this book about adolescent literacy? – What have I learned from this book about adolescent literacy in my content area? – How can this book inform my TUP? Posters will be shared during a course “Book Fair” and book reports are due during the fair. Your instructor will coordinate the book selection and presentations. Participation
