Course Name: Concepts in Homeland Security – ITEC 6500

Hours: 3

Course Description

This course provides an overview of the basic concepts of homeland security, including

infrastructure protection, jurisdiction, and issues in technical areas such as

interconnectivity and interoperability. The nation's telecommunications and information technology networks are examined as both vulnerable assets and critical solutions.

Prerequisites: Admission into MSIT

Note: This class will be regularly updated to ensure the most current issues are considered. Below is a representative schedule based on 2017 issues.
