Course Name: Experiential Learning Practicum – ITEC 4770

Hours: 6

Prerequisites: none

Course Description: The purpose of this course is to engage students to think critically and creatively within an experiential learning environment, deepening learning and intensifying the educational impact of the experience in the program of the study. This course is a hands-on work or service opportunity within a professional setting under which the student is guided and supervised by a professor. It is an opportunity for students, to test drive a potential career, acquire marketable skills for high-demand careers, and learn about the day-to-day obligations of the professional work

environment. This course is intended to be taken at the end of the elected program of study.

Textbook and Resources:

None

Learning Outcomes

Upon completion of this course, the student will:

- Demonstrate and assess the skills required for professional success
- Apply knowledge in the program of study in a related work setting
- Identify and express marketable skills that will be of benefit to a future career in the program of study
- Demonstrate a strong professional work ethic as it relates to achieving individual and team goals, while effectively serving others
- Identify and research a professional organization that relates to the program of study
- Create a hands-on project that demonstrates mastery of a topic in the program of study
