

Academic Affairs Board
Meeting #7, 27 – 30 March 2020
VIRTUAL MEETING

Stephen Morse's initial catalogue description of SMGT 6010 was:

This course is designed to cover some of the main areas handled by Athletic Administrators in Interscholastic Sports as well as Professional Sports. Topics cover governance in college and high school, human resources practices including the use of volunteers, technology, planning for facilities and budgets, and other topics related to sports administration. The final paper will require the students to use the knowledge gained in multiple areas of the course to create a business plan for an interscholastic sports program. It will prepare students to take these skills to the real world and be able to develop a business plan in multiple areas of athletic administration.

It was revised to:

This course is designed to cover some of the main areas handled by athletic administrators in interscholastic sports and professional sports. Topics cover governance in college and high school, human resources practices, including the use of volunteers; technology; planning for facilities and budget, and other topics related to sports administration. The final paper will require that students use the knowledge gained in multiple areas of the course to create a business plan for an interscholastic sports program that can be applied to multiple areas of athletic administration.

Stephen Morse's initial catalogue description of SMGT 6020 was:

This course covers many of the areas of law as specific to sports and includes many general types of law by reviewing specific cases, instances, or developing issues in the world of sports related to negligence, torts, risk management, contracts, anti-discrimination, constitutional law, anti-trust, labor law, and collective bargaining agreements which consistently come up at all levels from youth sports to the professional levels. The paper for this course will be in a topic related to a current sports law issue such as extending nets in baseball stadiums, pr-7.6 likeplan rightnti-25.18

related to a current sports law issue such as extending nets in baseball stadiums; discrimination suits in soccer; paying college student-athletes for likeness rights; and many other topics from which a student may choose. Students will be able to recognize issues and regulations in the sports world to look for risk management and development of helping their organization avoid potential issues.

Stephen Morse's initial catalogue description of SMGT 6030 was:

This course will cover topics in the area of dealing with psychological aspects in sports related to student-athletes and administration. Topics start with a view of sports as a microcosm of society and how sports fit into society. Other topics cover the individual personalities and what is learned through sports as well as how to deal with areas such as stress and anxiety in and through sports. Different types of motivation as well as diversity and teamwork are key components to this course. Finally the course finishes with the areas of good leadership and benefits gained by an individual when participating in sports. The paper for this course will be rather open to allow students to select a topic related to sports psychology as an ever expanding field and select a topic of interest to the student. This course will teach students about the differences sports can show and bring together as well as provide opportunities for learning and dealing with differences on the field or in other areas of life.

It was revised to:

This course will cover psychological aspects in sports related to student-athletes and administration. Topics include sports as a microcosm of society, and how sports fit into society; how individual personalities learn through sports; and how sports participants deal with stress and anxiety in sports. Motivation, diversity, teamwork, and leadership are key components to this course. Finally, this course teaches students how sports reveal differences and how participants come together as a team when exposed to differences on the field or in other areas of life. The paper for this course will allow students to select a topic related to sports psychology as an ever expanding field and select a topic of interest to the student.

Kevin Cantwell noted that for SMGT 6010, SMGT 6020, and SMGT 6030 there are no prerequisites listed. He suggested the addition of "Admission to the MSM program or permission of the Graduate Program Director" to each course description.

Debra Matthews stated that the change could be made after the approval of the course.

SMGT 6010, SMGT 6020, and SMGT 6030 electronically approved unanimously with revisions.

Burnett asked if proposed program should be "Certificate in" or "Certificate of" aviation safety.

Certificate and AERO 4204 electronically approved unanimously.

7. Discussed en bloc

New Program	Certificate in Technical Operations Management
