

Standard Operating Procedure for Batteries

Batteries must be recycled.

Environmental Health & Safety accepts

Alkaline

Lithium and Lithium Ion

Lead Acid

NickelCadmium

Batteries are managed as Universal Wastes. They are collected in properly labeled containers in designated areas around campus. Battery locations are checked and updated every other month.

Battery Recycling Locations

from designated areas.

Containers must be labeled and say one of the following:

Universal Waste Batteries, Waste Batteries, Used Batteries.

EHS staff periodically checks containers to verify container labeling and ensure guidelines are being followed. When the container is full or prior to one year from accumulation start date has elapsed, EHS staff bring the containers back to the Plant Operations universal waste area.
